Education

Chandigarh University, Mohali, Punjab |

Aug 2022 – June 2026

Bachelor of Engineering in Computer Science and Engineering, | CGPA:7.38/10.0

Dav Public School, Jamalpur (CBSE) |

April 2019 – March 2021

Higher Secondary (Class 12) | Percentage: 72.2%

Technical Skills

Languages: JavaScript (ES6+), TypeScript, C++, SQL

Frameworks and Developer Tools: React.js, Node.js, Express.js, Next.js, Tailwind CSS, Git, GitHub, Postman, VS Code, Vercel, Render

Databases: MongoDB, PostgreSQL, MySQL, Supabase

Technical Courses: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks, Statistics

Experience

Intel Corporation |

May 2025 – June 2025

AI/ML Intern / Intel Unnati Program | Mohali, Punjab

- Analyzed 25,000+ movie ratings and metadata records using Python (Pandas, NumPy), building a personalized recommendation engine via collaborative and content-based filtering and improving recommendation relevance by 20%.
- Processed and cleaned large-scale ratings and metadata datasets, applying statistical analysis to generate personalized, data-driven recommendations.
- Evaluated model performance using recommendation metrics, reporting findings and optimizing prediction accuracy.

Daapen Technologies Pvt. Ltd. |

May 2023 – Nov 2024

Frontend Developer Intern | Remote

- Created a reusable React.js component library adopted across 3+ production applications, eliminating redundant UI development and ensuring cross-application design consistency.
- Integrated 10+ RESTful APIs with React.js frontends, reducing page load times by approximately 30% and improving user experience.
- Delivered 3 product feature releases on schedule by collaborating in a 6-person Agile/Scrum team comprising backend engineers and UI/UX designers.

Projects

RankPulse – AI SEO Monitoring Platform: | [Live Demo](#)

| React.js, TypeScript, Node.js, Express.js, MongoDB, Browserbase, Google Gemini AI

- Developed a full-stack SEO analytics platform enabling users to analyze website SEO, track keyword rankings, and monitor historical search performance through an interactive dashboard.
- Integrated Browserbase with Google Gemini AI to automate website analysis, generate AI-powered SEO reports, and deliver actionable optimization recommendations.
- Implemented JWT-based authentication, automated keyword tracking with scheduled background jobs, and competitor ranking analysis to support continuous SEO monitoring.

ConvexUI – A UI Component Library | [Live Demo](#)

| Next.js 15, React, TypeScript, Tailwind CSS, Radix UI, Motion, MDX/Fumadocs, Vitest, Playwright

- Built ConvexUI with 130+ installable React components, reusable hooks, and UI blocks covering AI, dashboards, authentication, and e-commerce.
- Engineered a shadcn CLI-compatible registry using public/r/*, enabling one-command component installation across React/Next.js projects.
- Optimized the documentation experience with lazy-loaded component previews and isolated demo routes, reducing unnecessary Next.js builds when rendering multiple component variants.

InterviewOS – AI-Powered Interview Preparation Platform: | [Live Demo](#)

| MERN Stack, Groq AI, LLaMA 3.3 70B

- Generated AI-powered interview preparation content using LLaMA 3.3 70B, supporting 500+ technical questions across multiple domains.
- Developed secure REST APIs with JWT authentication and bcrypt-based password protection, utilizing MongoDB Atlas for data storage.
- Designed and implemented a responsive React dashboard with 5+ core modules including session history, bookmarking, notes, and profile management.

Certifications

- Intel Unnati – Artificial Intelligence and Machine Learning Workshop
- The Complete 2024 Web Development Bootcamp, Udemy
